PROFILE:

Industrial Designer interested in Product Design, with knowledge in different types of productive processes and materials, such as plastic, metal, wood, resins among others. Interested in the full development of products, starting from investigation to production: from a brainstorming through functional and experimental models/prototypes, feedback with consumer, etc.
Excellent interpersonal relations, focused on results, extremely creative, with high analysis capacity, committed, responsible, versatile and dynamic.

WORK EXPERIENCE:

(02/07 – 04/07)

**FUSION Studio Design,
Designer**

London, UK

- Creative developments of concepts and ideas.
- 3D sketching and modelling.
- Graphic presentation for the clients.
- Research typologies in the market.

(01/04 – 12/06)

**TACTIL Design Ltd.
Manager and Project Director**

Bogotá, Colombia

- Direct contact with the customers: understanding of their needs and development of the requested product
- Creative development of concepts until the final idea is achieved.
- 3D sketching and modelling.
- Suppliers' management, according to each project.
- On-going direct contact with specialists in each field (suppliers, production and so on)
- Production: in-house (whenever our facilities made it possible); or sub hiring specialized suppliers when needed.
- Official delivery and installation of the product
- Post-selling service: follow-up with the delivered products and redesign them, in case clients requested so.
